

PROPOSAL 81

5 AAC 92.052. Discretionary permit hunt conditions and procedures.

Require blaze orange be worn by moose hunters on Kalgin Island in Unit 15B as follows:

Recommend that all moose hunters on Kalgin Island be required to wear blaze orange on upper half of body.

What is the issue you would like the board to address and why? Increased safety risk resulting from failure of State of Alaska to enact possible regulatory measures which would contribute to safer hunting environment. Of concern is the increased risk of hunting accident fatalities and injuries incurred on Kalgan Island as a result of heavy timber and allowance of killing of any moose (excluding cows with calf). Reported deaths of two hunters in past is of concern.
